

Decorative Panels

Panel surface and frame both in aluminium

Made in France

- OVER 50% ENERGY SAVINGS**

Compared to traditional electric heating. Meet environmental expectations.

- How it works**

Solid objects are heated, Furniture ,wall,floor etc. and give back a soft warmth and an optimal feeling of confort.

- Comfort and security**

The room is rapidly heated. The panel operated silently, there is no dust circulation and a feeling of well- being is offered.

The panel remains at a low temperature thus avoiding black marks and dirt on the walls and makes the panel safe to touch.

- Placement and installation**

The concept of the panels, together with their low surface area enables a freedom of choice as to where they will be installed, i.e walls and ceilings.
